Subject Index

Volume 26, July-December 1995

A

Abstracts
Abstracts of the Council for High Blood Pressure Research 49th Annual Fall Conference and Scientific Sessions, 537

Acetylcholine
Effect of Copper-Zinc Superoxide Dismutase on Endothelium-Dependent Vasodilation in Patients With Essential Hypertension, 863
Effects of Low and High Doses of Fosinopril on the Structure and Function of Resistance Arteries, 118
Role of Basal and Stimulated Release of Nitric Oxide in the Regulation of Radial Artery Caliber in Humans, 327
Vasodilator Response of Mesenteric Arterioles to Histamine in Spontaneously Hypertensive Rats, 397

Adenosine
Adenosine A_1 Receptor mRNA in Microdissected Rat Nephron Segments, 1181

Adenyl cyclase
G Protein Alterations in Hypertension and Aging, 725

Adolescent medicine
Calcium-ATPase and Insulin in Adolescent Offspring of Essential Hypertensive Parents, 1070
Role of Anthropometric Indexes and Blood Pressure as Determinants of Left Ventricular Mass and Geometry in Adolescents: The Rio de Janeiro Study, 1190

Adrenal glands
Distinct Mechanisms of Upregulation of Type 1A Angiotensin II Receptor Gene Expression in Kidney and Adrenal Gland, 1134
Gene Expression of Angiotensin II Receptor in Blood Cells of Cushing's Syndrome, 1003
Renin mRNA, Quantified by Polymerase Chain Reaction, in Renal Hypertensive Rat Tissues, 656

Adrenal medulla
Chromogranin A in Human Hypertension: Influence of Heredity, 213
Influence of Androgen on Tyrosine Hydroxylase mRNA in Adrenal Medulla of Spontaneously Hypertensive Rats, 208

Adrenergic beta-antagonists
Differential Modulation of Baroreceptor Sensitivity by Long-term Antihypertensive Treatment, 425
Low-Intensity Exercise Training Attenuates Cardiac β-Adrenergic Tone During Exercise in Spontaneously Hypertensive Rats, 1129

β-Adrenergic receptors (see Receptors, adrenergic, beta)

Africa, Western
Weight Threshold and Blood Pressure in a Lean Black Population, 616

Age factors
Aortic Wall Properties in Normotensive and Hypertensive Rats of Various Ages In Vivo, 363
Gender Differences in Left Ventricular Growth, 979
Isolated Diastolic Hypertension: A Favorable Finding Among Young and Middle-aged Hypertensive Subjects, 377

Aged (see Aging)

Aging
A Randomized Controlled Trial of Stress Reduction for Hypertension in Older African Americans, 820
Noninvasive Determination of Shear-Rate Distribution Across the Arterial Lumen, 26
Structural Versus Functional Modulation of the Arterial Baroreflex, 341

Albuminuria
Combined Renal Effects of Overweight and Hypertension, 610
Insulin Resistance in Microalbuminuric Hypertension: Sites and Mechanisms, 789

Aldosterone
Acute Effects of Physiological Increments of Brain Natriuretic Peptide in Humans, 628
Amylin Stimulates Plasma Renin Concentration in Humans, 460
Biological Determinants of Aldosterone-Induced Cardiac Fibrosis in Rats, 971
Effects of Long-term Nitric Oxide Synthesis Inhibition on Plasma Volume Expansion and Fetal Growth in the Pregnant Rat, 1019
Left Ventricular Fibrosis in Renovascular Hypertensive Rats: Effect of Losartan and Spironolactone, 101
Regional Hemodynamic and Endocrine Effects of Aldosterone and Cortisol in Conscious Sheep: Comparison With the Effects of Corticotropin, 294

Algorithms
Assessment of Arterial Distensibility by Automatic Pulse Wave Velocity Measurement: Validation and Clinical Application Studies, 485

Alteplase
Enhanced Levels of Tissue-Type Plasminogen Activator in Borderline Hypertension, 796

Amlodipine
Comparison of Perindopril and Amlodipine in Cyclosporine-Treated Renal Allograft Recipients, 436

Androgens
Influence of Androgen on Tyrosine Hydroxylase mRNA in Adrenal Medulla of Spontaneously Hypertensive Rats, 208

Aneurysm
Stimulation of Endogenous Nitric Oxide Pathway by L-Arginine Reduces Declamp Mortality and Attenuates Hypertension Associated With Aortic Cross-Clamp–Induced Hindlimb Ischemia in Rats, 406

Angiotensin-converting enzyme
Calcium Channel Blockers as Inhibitors of Angiotensin I–Converting Enzyme, 1145
Inhibition of Atrial Natriuretic Peptide Excretory Action by Bradykinin, 1167

Angiotensin II
Altered Angiotensinogen Amino Acid Sequence and Plasma Angiotensin II Levels in Genetically Hypertensive Rats: A Study on Cause and Effect, 279
Basal and Angiotensin II–Induced Cytosolic Free Calcium in Adult Rat Cardiomyocytes and Fibroblasts After Volume Overload, 1149
β-Adrenergic, Angiotensin II, and Bradykinin Receptors Enhance Neurotransmission in Human Kidney, 445
Effect of Captopril and Angiotensin II Receptor Blockade on Pressure Natriuresis in Transgenic TGR(mRen-2)27 Rats, 471
Effects of Losartan on Blood Pressure, Metabolic Alterations, and Vascular Reactivity in the Fructose-Induced Hypertensive Rat, 1074
Endothelial AT_1–Mediated Release of Nitric Oxide Decreases Angiotensin II Contractions in Rat Carotid Artery, 752
Heterogeneity in Vascular Smooth Muscle Responsiveness to Angiotensin II: Role of Endothelin, 83
Left Ventricular Fibrosis in Renovascular Hypertensive Rats: Effect of Losartan and Spironolactone, 101
Pressor and Reflex Sensitivity Is Altered in Spontaneously Hypertensive Rats Treated With Angiotensin-(1-7), 1138
Regional Hemodynamic Effects of the AT_1 Receptor Antagonist CV-11974 in Conscious Renal Hypertensive Rats, 989
Regulation of Neuronal Calcitonin Gene–Related Peptide Expression: Role of Increased Blood Pressure, 1177

Renal Circulation and Blockade of the Renin-Angiotensin System: Is Angiotensin-Converting Enzyme Inhibition the Last Word? 602
Role of Nitric Oxide in Modulating the Vasoconstrictor Actions of Angiotensin II in Preglomerular and Postglomerular Vessels in Dogs, 1024

Angiotensin receptors (see Receptors, angiotensin)

Angiotensin–converting enzyme inhibitors
Angiotensin-(1-7) Potentiates the Hypotensive Effect of Bradykinin in Conscious Rats, 1154
Angiotensin-Converting Enzyme Inhibition and Radial Artery Compliance in Patients With Congestive Heart Failure, 491
Aortic Stiffness and Left Ventricular Mass in a Rat Model of Isolated Systolic Hypertension, 963
Antihypertensive Treatment Efficacy in Type II Diabetes Mellitus: Dissociation Between Casual and 24-Hour Ambulatory Blood Pressure, 1093
Attenuation of Genetic Hypertension After Short-term Vasopressin V1A Receptor Antagonism, 828
Chronic Angiotensin-Converting Enzyme Inhibition and Endothelial Function of Rat Aorta, 738
Contrasting Effect of Antihypertensive Treatment on the Renal Response to L-Arginine, 937
Contribution of Systemic Blood Pressure to Myocardial Remodeling in Uremic Rats, 321
Differential Modulation of Baroreceptor Sensitivity by Long-term Antihypertensive Treatment, 425
Differing Mechanisms of Action of Angiotensin-Converting Enzyme Inhibition in Black and White Hypertensive Patients, 124
Effects of Low and High Doses of Fosinopril on the Structure and Function of Resistance Arteries, 118
Nitric Oxide and Prostaglandins in the Prolonged Effects of Losartan and Ramipril in Hypertension, 236

Angiotensinogen
Effects of Human Renin in the Vasculature of Rats Transgenic for Human Angiotensinogen, 272

Angiotensins
Coronary Kinin Generation Mediates Nitric Oxide Release After Angiotensin Receptor Stimulation, 164
Effects of Human Renin in the Vasculature of Rats Transgenic for Human Angiotensinogen, 272

Animals, transgenic
Endothelin in the Kidney in Malignant Phase Hypertension, 925

Anthropometry
Role of Anthropometric Indexes and Blood Pressure as Determinants of Left Ventricular Mass and Geometry in Adolescents: The Rio de Janeiro Study, 1190

Antihypertensive agents
Differing Mechanisms of Action of Angiotensin-Converting Enzyme Inhibition in Black and White Hypertensive Patients, 124
Effects of Antihypertensive Agents on Local Arterial Distensibility and Compliance, 531
The Arterial System in Hypertension: A Prospective View, 10
The Trough-to-Peak Ratio as an Instrument to Evaluate Antihypertensive Drugs, 942
Transforming Growth Factor-β1 Expression and Phenotypic Modulation in the Kidney of Hypertensive Rats, 199

Antihypertensive therapy (see Antihypertensive agents)

Aorta
Aortic Distensibility and Structural Changes in Sinoaortic-Denervated Rats, 337
Aortic Wall Properties in Normotensive and Hypertensive Rats of Various Ages In Vivo, 363
Differential Modulation of Baroreceptor Sensitivity by Long-term Antihypertensive Treatment, 425
Genetic and Environmental Factors in the Function and Structure of the Arterial Wall, 34
Heterogeneity of Adenovirus-Mediated Gene Transfer in Cultured Thoracic Aorta and Renal Artery of Rats, 1046
Insulin Modulation of Vascular Reactivity Is Already Impaired in Prehypertensive Spontaneously Hypertensive Rats, 290
Prostacyclin Synthesis Elicited by Endothelin-1 in Rat Aorta Is Mediated by an ET_A Receptor via Influx of Calcium and Is Independent of Protein Kinase C, 1035
Underestimation of Vasodilator Effects of Nitroglycerin by Upper Limb Blood Pressure, 520

Aorta, ascending (see Aorta)

Aortic rings (see Aorta)

Apoptosis
Apoptosis in Target Organs of Hypertension, 642

Aprotinin
Coronary Kinin Generation Mediates Nitric Oxide Release After Angiotensin Receptor Stimulation, 164

Arachidonic acid
Relationship of Arachidonic Acid Release to Porcine Coronary Artery Relaxation, 684

Arginine
Contrasting Effect of Antihypertensive Treatment on the Renal Response to L-Arginine, 937
Renal Vasodilation With L-Arginine: Effects of Dietary Salt, 256
Stimulation of Endogenous Nitric Oxide Pathway by L-Arginine Reduces Declamp Mortality and Attenuates Hypertension Associated With Aortic Cross-Clamp–Induced Hindlimb Ischemia in Rats, 406

Arrhythmia
Blood Pressure Influences the Occurrence of Complex Ventricular Arrhythmia in Hemodialysis Patients, 1200

Arterial compliance (see Compliance)

Arterial wall (see Muscle, smooth, vascular)

Arteries
Angiotensin-Converting Enzyme Inhibition and Radial Artery Compliance in Patients With Congestive Heart Failure, 491
Aortic Wall Properties in Normotensive and Hypertensive Rats of Various Ages In Vivo, 363
Arterial Wall Hypertrophy and Stiffness in Essential Hypertensive Patients, 355
Assessment of Arterial Distensibility by Automatic Pulse Wave Velocity Measurement: Validation and Clinical Application Studies, 485
Effects of Antihypertensive Agents on Local Arterial Distensibility and Compliance, 531
Endothelin Subtype B Receptor–Mediated Calcium and Contractile Responses in Small Arteries of Hypertensive Rats, 1041
Influence of Sex on Arterial Hemodynamics and Blood Pressure: Role of Body Height, 514
Relationship of Arachidonic Acid Release to Porcine Coronary Artery Relaxation, 684
Role of Basal and Stimulated Release of Nitric Oxide in the Regulation of Radial Artery Caliber in Humans, 327
Sympathetic Modulation of Radial Artery Compliance in Congestive Heart Failure, 348
The Arterial System in Hypertension: A Prospective View, 10

Arteriosclerosis
Mechanical Principles in Arterial Disease, 2

Atherosclerosis
Genetic and Environmental Factors in the Function and Structure of the Arterial Wall, 34
Is White Coat Hypertension Associated With Arterial Disease or Left Ventricular Hypertrophy? 413
Mechanical Principles in Arterial Disease, 2
Noninvasive Pulse Wave Analysis for the Early Detection of Vascular Disease, 503
Prevalence and Determinants of Cardiac and Vascular Hypertrophy in Hypertension, 369
Sick Vessel Syndrome: Recovery of Atherosclerotic and Hypertensive Vessels, 509
Structural Versus Functional Modulation of the Arterial Baroreflex, 341

Atrial function
Contribution of Atrial Reservoir Function to Ventricular Filling in Hypertensive Patients: Effects of Nifedipine Administration, 815

Atrial natriuretic factor
Atrial Natriuretic Peptide in Chronically Hypertensive Dogs, 634
Human Atrial Natriuretic Peptide Gene Delivery Reduces Blood Pressure in Hypertensive Rats, 847
Inhibition of Atrial Natriuretic Peptide Excretory Action by Bradykinin, 1167

Reduced Renal Extraction of Atrial Natriuretic Peptide in Primary Aldosteronism, 624
Autonomic nervous system
Acute Exercise Attenuates Cardiac Autonomic Regulation in Hypertensive Rats, 676
Autonomic Nervous Function in Non-dipper Essential Hypertensive Subjects: Evaluation by Power Spectral Analysis of Heart Rate Variability, 808
Divergent Effects of Dihydropyridine and Phenylalkylamine Calcium Channel Antagonist Classes on Autonomic Function in Human Hypertension, 143

B

B-lymphocytes
Enhanced Immunoglobulin Formation of Immortalized B Cells From Hypertensive Patients, 432
Baroreflex
Autonomic Dysfunction in Short-term Experimental Diabetes, 1100
Changes of Renal Sympathetic Activity in Acute and Chronic Conscious Sinoaortic Denervated Rats, 1111
Divergent Effects of Dihydropyridine and Phenylalkylamine Calcium Channel Antagonist Classes on Autonomic Function in Human Hypertension, 143
Pressor and Reflex Sensitivity Is Altered in Spontaneously Hypertensive Rats Treated With Angiotensin-(1-7), 1138
Role of Periaqueductal Gray Matter in Hypertension in Spontaneously Hypertensive Rats, 1125
Stimulation of Endogenous Nitric Oxide Pathway by L-Arginine Reduces Declamp Mortality and Attenuates Hypertension Associated With Aortic Cross-Clamp–Induced Hindlimb Ischemia in Rats, 406
Structural Versus Functional Modulation of the Arterial Baroreflex, 341
Bias
Physiological Influences on Continuous Finger and Simultaneous Intra-arterial Blood Pressure, 307
Blacks
A Randomized Controlled Trial of Stress Reduction for Hypertension in Older African Americans, 820
Differing Mechanisms of Action of Angiotensin-Converting Enzyme Inhibition in Black and White Hypertensive Patients, 124
Does Keloid Pathogenesis Hold the Key to Understanding Black/White Differences in Hypertension Severity? 858
Weight Threshold and Blood Pressure in a Lean Black Population, 616
Blood cells
Gene Expression of Angiotensin II Receptor in Blood Cells of Cushing's Syndrome, 1003
Blood circulation
Angiotensin-Converting Enzyme Inhibition and Radial Artery Compliance in Patients With Congestive Heart Failure, 491
Flow-Diameter Phase Shift: A Potential Indicator of Conduit Artery Function, 20
Renal Vasodilation With L-Arginine: Effects of Dietary Salt, 256
Blood flow (see Blood circulation)
Blood flow velocity
Contribution of Atrial Reservoir Function to Ventricular Filling in Hypertensive Patients: Effects of Nifedipine Administration, 815
Blood platelets
Calcium Supplementation Attenuates an Enhanced Platelet Function in Salt-Loaded Mildly Hypertensive Patients, 156
Enhanced Immunoglobulin Formation of Immortalized B Cells From Hypertensive Patients, 432
Blood pressure
Acute Exercise Attenuates Cardiac Autonomic Regulation in Hypertensive Rats, 676
Autonomic Nervous Function in Non-dipper Essential Hypertensive Subjects: Evaluation by Power Spectral Analysis of Heart Rate Variability, 808
Blood Pressure Influences the Occurrence of Complex Ventricular Arrhythmia in Hemodialysis Patients, 1200
Changes of Renal Sympathetic Activity in Acute and Chronic Conscious Sinoaortic Denervated Rats, 1111
Chronic Infusion of Angiotensin II Resets Baroreflex Control of Heart Rate by an Arterial Pressure–Independent Mechanism, 420
Circadian Profile of Systemic Hemodynamics, 55
Combinations of Potassium, Calcium, and Magnesium Supplements in Hypertension, 950
Comparison of Candoxatril and Atrial Natriuretic Factor in Healthy Men: Effects on Hemodynamics, Sympathetic Activity, Heart Rate Variability, and Endothelin, 1160
Effects of Chronic Estrogen Replacement Therapy on Beat-to-Beat Blood Pressure Dynamics in Healthy Postmenopausal Women, 711
Endopeptidase Inhibition in Angiotensin-Induced Hypertension: Effect of SCH 39370 in Sheep, 89
Evaluation of the Technique Used by Health-Care Workers for Taking Blood Pressure, 1204
Genetic and Environmental Factors in the Function and Structure of the Arterial Wall, 34
Human Atrial Natriuretic Peptide Gene Delivery Reduces Blood Pressure in Hypertensive Rats, 847
Hypertension Prevalence, Awareness, Treatment, and Control in Egypt: Results From the Egyptian National Hypertension Project (NHP), 886
Isolated Diastolic Hypertension: A Favorable Finding Among Young and Middle-aged Hypertensive Subjects, 377
Low-Intensity Exercise Training Attenuates Cardiac β-Adrenergic Tone During Exercise in Spontaneously Hypertensive Rats, 1129
Nifedipine Prevents Renal Injury in Rats With Chronic Nitric Oxide Inhibition, 150
Nitric Oxide and Prostaglandins in the Prolonged Effects of Losartan and Ramipril in Hypertension, 236
Pressor and Reflex Sensitivity Is Altered in Spontaneously Hypertensive Rats Treated With Angiotensin-(1-7), 1138
Pressor Effects of Portal Venous Oleate Infusion: A Proposed Mechanism for Obesity Hypertension, 193
Relationship Between Systemic Hemodynamics and Ambulatory Blood Pressure Level Are Sex Dependent, 1195
Renin and Angiotensin II Receptor Gene Expression in Kidneys of Renal Hypertensive Rats, 733
Renin mRNA, Quantified by Polymerase Chain Reaction, in Renal Hypertensive Rat Tissues, 656
Role of Anthropometric Indexes and Blood Pressure as Determinants of Left Ventricular Mass and Geometry in Adolescents: The Rio de Janeiro Study, 1190
Role of the Rostral Ventrolateral Medulla in Maintenance of Blood Pressure in Rats With Goldblatt Hypertension, 1117
The Egyptian National Hypertension Project (NHP): Design and Rationale, 880
Trends in the Prevalence, Awareness, Treatment, and Control of Hypertension in the Adult US Population: Data From the Health Examination Surveys, 1960 to 1991, 60
Underestimation of Vasodilator Effects of Nitroglycerin by Upper Limb Blood Pressure, 520
Weight Threshold and Blood Pressure in a Lean Black Population, 616
Blood pressure determination
A Consensus View on the Technique of Ambulatory Blood Pressure Monitoring, 912
Effect of Regional and Systemic Changes in Vasomotor Tone on Finger Pressure Amplification, 315
Evaluation of the Technique Used by Health-Care Workers for Taking Blood Pressure, 1204
Gene Expression of Angiotensin II Receptor in Blood Cells of Cushing's Syndrome, 1003
Isolated Elevation of Diastolic Blood Pressure: Real or Artifactual? 383
Blood pressure determination, finger (see Blood pressure determination)
Blood pressure measurement (see Blood pressure)
Blood pressure monitoring
A Consensus View on the Technique of Ambulatory Blood Pressure Monitoring, 912

Antihypertensive Treatment Efficacy in Type II Diabetes Mellitus: Dissociation Between Casual and 24-Hour Ambulatory Blood Pressure, 1093
Comparison of Perindopril and Amlodipine in Cyclosporine-Treated Renal Allograft Recipients, 436
Heritability of Conventional and Ambulatory Blood Pressures: A Study in Twins, 919
Noninvasive Ambulatory 24-Hour Blood Pressure in Patients With High Normal Blood Pressure and Exaggerated Systolic Pressure Response to Exercise, 1121
Physiological Influences on Continuous Finger and Simultaneous Intra-arterial Blood Pressure, 307
Pulse Pressure and Resistance Artery Structure in the Elderly, 301
Relationship Between Systemic Hemodynamics and Ambulatory Blood Pressure Level Are Sex Dependent, 1195
Serum Insulin Levels, 24-Hour Blood Pressure Profile, and Left Ventricular Mass in Nonobese Hypertensive Patients, 1085
State of the Market: A Review of Ambulatory Blood Pressure Monitoring Devices, 835
Target Organ Status and Serum Lipids in Patients With White Coat Hypertension, 801
The Trough-to-Peak Ratio as an Instrument to Evaluate Antihypertensive Drugs, 942

Blood pressure monitoring, ambulatory (see Blood pressure monitoring)

Blood pressure monitors
A Consensus View on the Technique of Ambulatory Blood Pressure Monitoring, 912

Blood pressure, ambulatory (see Blood pressure monitoring)

Blood pressure, arterial (see Blood pressure)

Blood vessels
Effect of Copper-Zinc Superoxide Dismutase on Endothelium-Dependent Vasodilation in Patients With Essential Hypertension, 863
Pulse Pressure and Resistance Artery Structure in the Elderly, 301

Blood, platelet (see Blood platelets)

Brachial artery
Effect of Regional and Systemic Changes in Vasomotor Tone on Finger Pressure Amplification, 315

Bradycardia
Low-Intensity Exercise Training Attenuates Cardiac β-Adrenergic Tone During Exercise in Spontaneously Hypertensive Rats, 1129

Bradykinin
β-Adrenergic, Angiotensin II, and Bradykinin Receptors Enhance Neurotransmission in Human Kidney, 445
Angiotensin-(1-7) Potentiates the Hypotensive Effect of Bradykinin in Conscious Rats, 1154
Chronic Angiotensin-Converting Enzyme Inhibition and Endothelial Function of Rat Aorta, 738
Kallikreins and Kinins: Some Unanswered Questions About System Characteristics and Roles in Human Disease, 221

Brain
Role of the Rostral Ventrolateral Medulla in Maintenance of Blood Pressure in Rats With Goldblatt Hypertension, 1117

Bufanolides
Endogenous Marinobufagenin-like Immunoreactive Factor and Na^+,K^+ ATPase Inhibition During Voluntary Hypoventilation, 781

C

Ca^{2+}-transporting ATPase
Calcium-ATPase and Insulin in Adolescent Offspring of Essential Hypertensive Parents, 1070

Calcitonin gene–related peptide
Regulation of Neuronal Calcitonin Gene–Related Peptide Expression: Role of Increased Blood Pressure, 1177

Calcium
Basal and Angiotensin II–Induced Cytosolic Free Calcium in Adult Rat Cardiomyocytes and Fibroblasts After Volume Overload, 1149
Calcium Supplementation Attenuates an Enhanced Platelet Function in Salt-Loaded Mildly Hypertensive Patients, 156
Combinations of Potassium, Calcium, and Magnesium Supplements in Hypertension, 950
Effects of Dehydroepiandrosterone Sulfate on Cellular Calcium Responsiveness and Vascular Contractility, 1065
Intracellular Ca^{2+} Release in Flow-Induced Contraction of Venous Smooth Muscle, 1051
Prostacyclin Synthesis Elicited by Endothelin-1 in Rat Aorta Is Mediated by an ET_A Receptor via Influx of Calcium and Is Independent of Protein Kinase C, 1035
Sodium-Proton Exchange and Primary Hypertension: An Update, 649

Calcium antagonists (see Calcium channel blockers)

Calcium channel blockers
Calcium Channel Blockers as Inhibitors of Angiotensin I–Converting Enzyme, 1145
Differential Modulation of Baroreceptor Sensitivity by Long-term Antihypertensive Treatment, 425
Nifedipine Prevents Renal Injury in Rats With Chronic Nitric Oxide Inhibition, 150
Renal Artery Stenosis Rapidly Enhances Atrial Natriuretic Peptide Gene Expression, 1011
Short- and Long-term Effects of Antihypertensive Drugs on Arterial Reflections, Compliance, and Impedance, 524

Calcium channels
Augmented Calcium Currents in Mesenteric Artery Branches of the Spontaneously Hypertensive Rat, 1060
Effects of Furosemide and Verapamil on the NaCl Dependency of Macula Densa–Mediated Renin Secretion, 137

Calmodulin-dependent protein kinases
Thromboxane A_2 and Vascular Smooth Muscle Cell Proliferation, 771

Captopril
Effect of Captopril and Angiotensin II Receptor Blockade on Pressure Natriuresis in Transgenic TGR(mRen-2)27 Rats, 471
Short- and Long-term Effects of Antihypertensive Drugs on Arterial Reflections, Compliance, and Impedance, 524

Cardiac hypertrophy (see Hypertrophy)

Cardiac output
Comparison of Candoxatril and Atrial Natriuretic Factor in Healthy Men: Effects on Hemodynamics, Sympathetic Activity, Heart Rate Variability, and Endothelin, 1160
Nitric Oxide Synthase Inhibition in Spontaneously Hypertensive Rats: Systemic, Renal, and Glomerular Hemodynamics, 249
Noninvasive Pulse Wave Analysis for the Early Detection of Vascular Disease, 503
Regional Hemodynamic and Endocrine Effects of Aldosterone and Cortisol in Conscious Sheep: Comparison With the Effects of Corticotropin, 294
Relationship Between Systemic Hemodynamics and Ambulatory Blood Pressure Level Are Sex Dependent, 1195

Cardiovascular diseases
Diabetes Mellitus and Associated Hypertension, Vascular Disease, and Nephropathy: An Update, 869

Cardiovascular system
Radial Artery Compliance in Young, Obese, Normotensive Subjects, 984

Carotid arteries
Biaxial Mechanical Properties of Carotid Arteries From Normotensive and Hypertensive Rats, 15
Chronic Nitric Oxide Synthase Inhibition and Carotid Artery Distensibility in Renal Hypertensive Rats, 332
Is White Coat Hypertension Associated With Arterial Disease or Left Ventricular Hypertrophy? 413
Noninvasive Determination of Shear-Rate Distribution Across the Arterial Lumen, 26
Prevalence and Determinants of Cardiac and Vascular Hypertrophy in Hypertension, 369

Carotid artery (see Carotid arteries)

Carotid sinus
Structural Versus Functional Modulation of the Arterial Baroreflex, 341

Catecholamines
Comparison of Candoxatril and Atrial Natriuretic Factor in Healthy Men: Effects on Hemodynamics, Sympathetic Activity, Heart Rate Variability, and Endothelin, 1160

Divergent Effects of Dihydropyridine and Phenylalkylamine Calcium Channel Antagonist Classes on Autonomic Function in Human Hypertension, 143

Cell division
Vasoactive Diadenosine Polyphosphates Promote Growth of Cultured Renal Mesangial Cells, 899

Cell movement
Inhibition by Cardiac Natriuretic Peptides of Rat Vascular Endothelial Cell Migration, 401

cGMP (see Cyclic GMP)

Channel blockers, calcium (see Calcium channel blockers)

Cholesterol
Effects of Hypertension and Dyslipidemia on the Decline in Renal Function, 670

Chromogranins
Chromogranin A in Human Hypertension: Influence of Heredity, 213
Divergent Effects of Dihydropyridine and Phenylalkylamine Calcium Channel Antagonist Classes on Autonomic Function in Human Hypertension, 143

Chylomicrons
Malignant Hypertension Is Accompanied by Marked Alterations in Chylomicron Metabolism, 1207

Circadian rhythm
Circadian Profile of Systemic Hemodynamics, 55
Gender and Dietary NaCl in Spontaneously Hypertensive and Wistar-Kyoto Rats, 285

Circulation (see Blood circulation)

Circumferential stress (see Stress, mechanical)

Clinical trials
Effects of Losartan on a Background of Hydrochlorothiazide in Patients With Hypertension, 112

Clonidine
Suppressing Sympathetic Activation in Congestive Heart Failure: A New Therapeutic Strategy, 719

Cloning, molecular
Cloning, Characterization, and Genetic Mapping of the Rat Type 2 Angiotensin II Receptor Gene, 998
Investigation of the Phenylethanolamine *N*-Methyltransferase Gene as a Candidate Gene for Hypertension, 595

Collagen
Aortic Distensibility and Structural Changes in Sinoaortic-Denervated Rats, 337
Biological Determinants of Aldosterone-Induced Cardiac Fibrosis in Rats, 971
Left Ventricular Fibrosis in Renovascular Hypertensive Rats: Effect of Losartan and Spironolactone, 101

Compliance
Aortic Distensibility and Structural Changes in Sinoaortic-Denervated Rats, 337
Aortic Wall Properties in Normotensive and Hypertensive Rats of Various Ages In Vivo, 363
Arterial Wall Hypertrophy and Stiffness in Essential Hypertensive Patients, 355
Biaxial Mechanical Properties of Carotid Arteries From Normotensive and Hypertensive Rats, 15
Effects of Antihypertensive Agents on Local Arterial Distensibility and Compliance, 531
Effects of Hypertension on Viscoelasticity of Carotid and Femoral Arteries in Humans, 48
Mechanical Principles in Arterial Disease, 2
Noninvasive Pulse Wave Analysis for the Early Detection of Vascular Disease, 503
Radial Artery Compliance in Young, Obese, Normotensive Subjects, 984
Sympathetic Modulation of Radial Artery Compliance in Congestive Heart Failure, 348
The Arterial System in Hypertension: A Prospective View, 10

Coronary circulation
Chronic Inhibition of Nitric Oxide Synthesis Causes Coronary Microvascular Remodeling in Rats, 957

Correspondence (see Letters to the Editor)

Cortisol (see Hydrocortisone)

Creatinine
Effects of Hypertension and Dyslipidemia on the Decline in Renal Function, 670

Cross-sectional studies
Trends in the Prevalence, Awareness, Treatment, and Control of Hypertension in the Adult US Population: Data From the Health Examination Surveys, 1960 to 1991, 60

Cushing's syndrome
Gene Expression of Angiotensin II Receptor in Blood Cells of Cushing's Syndrome, 1003

CV-11974
Regional Hemodynamic Effects of the AT_1 Receptor Antagonist CV-11974 in Conscious Renal Hypertensive Rats, 989

Cyclic AMP
Regulation of Vascular Smooth Muscle Soluble Guanylate Cyclase Activity, mRNA, and Protein Levels by cAMP-Elevating Agents, 696

Cyclic GMP
Atrial Natriuretic Peptide in Chronically Hypertensive Dogs, 634
Endothelial AT_1–Mediated Release of Nitric Oxide Decreases Angiotensin II Contractions in Rat Carotid Artery, 752
Inhibition of Atrial Natriuretic Peptide Excretory Action by Bradykinin, 1167
Regulation of Vascular Smooth Muscle Soluble Guanylate Cyclase Activity, mRNA, and Protein Levels by cAMP-Elevating Agents, 696

Cyclosporine
Comparison of Perindopril and Amlodipine in Cyclosporine-Treated Renal Allograft Recipients, 436
Cyclosporine Impairs Vasodilation Without Increased Sympathetic Activity in Humans, 705
Effects of an Endothelin Receptor Antagonist in Rats With Cyclosporine-Induced Hypertension, 932

Cytokines

Letters to the Editor
Cell Volume and Blood Pressure, 374
Does Blockade of the Renin-Angiotensin System Prevent Heritability of Genetic Hypertension? 375
Effect of Antihypertensive Therapy on Small Artery Structure in Hypertensive Patients, 716
Measurements of Angiotensin Peptides, 843

Leukocytes, mononuclear
Gene Expression of Angiotensin II Receptor in Blood Cells of Cushing's Syndrome, 1003

Linkage (genetics)
Altered Angiotensinogen Amino Acid Sequence and Plasma Angiotensin II Levels in Genetically Hypertensive Rats: A Study on Cause and Effect, 279
Lipids
Target Organ Status and Serum Lipids in Patients With White Coat Hypertension, 801
Lipoproteins, HDL cholesterol
Effects of Hypertension and Dyslipidemia on the Decline in Renal Function, 670
Lisinopril
The Trough-to-Peak Ratio as an Instrument to Evaluate Antihypertensive Drugs, 942
Longitudinal stress (see Stress, mechanical)
Losartan
β-Adrenergic, Angiotensin II, and Bradykinin Receptors Enhance Neurotransmission in Human Kidney, 445
Coronary Kinin Generation Mediates Nitric Oxide Release After Angiotensin Receptor Stimulation, 164
Effects of Losartan on a Background of Hydrochlorothiazide in Patients With Hypertension, 112
Endothelial AT_1–Mediated Release of Nitric Oxide Decreases Angiotensin II Contractions in Rat Carotid Artery, 752
Heterogeneity in Vascular Smooth Muscle Responsiveness to Angiotensin II: Role of Endothelin, 83
Losartan potassium (see Losartan)

M

Magnesium
Combinations of Potassium, Calcium, and Magnesium Supplements in Hypertension, 950
Male
Weight Threshold and Blood Pressure in a Lean Black Population, 616
Malignant hypertension (see Hypertension, malignant)
Medulla oblongata
Cardiovascular and Respiratory Effects of Endothelin in the Ventrolateral Medulla of the Normotensive Rat, 263
Menopause
Influence of Sex on Arterial Hemodynamics and Blood Pressure: Role of Body Height, 514
Mesangium, glomerular (see Glomerular mesangium)
Mesenteric arteries
Enhanced Vascular Neuropeptide Y–Immunoreactive Innervation in Two Hypertensive Rat Strains, 758
Structural and Functional Properties of Isolated, Pressurized, Mesenteric Resistance Arteries From a Vasopressin-Deficient Rat Model of Genetic Hypertension, 390
Mesenteric artery, superior (see Mesenteric arteries)
Methoxamine
Chronic Infusion of Angiotensin II Resets Baroreflex Control of Heart Rate by an Arterial Pressure–Independent Mechanism, 420
Microcirculation
Chronic Inhibition of Nitric Oxide Synthesis Causes Coronary Microvascular Remodeling in Rats, 957
Vasodilator Response of Mesenteric Arterioles to Histamine in Spontaneously Hypertensive Rats, 397
Models, cardiovascular
Neuropeptide Y Prevents Agonist-Stimulated Increases in Contractility, 480
Molecular biology
The Arterial System in Hypertension: A Prospective View, 10
Muscle contraction
Intracellular Ca^{2+} Release in Flow-Induced Contraction of Venous Smooth Muscle, 1051
Muscle, smooth, vascular
Apoptosis in Target Organs of Hypertension, 642
Biaxial Mechanical Properties of Carotid Arteries From Normotensive and Hypertensive Rats, 15
Does Keloid Pathogenesis Hold the Key to Understanding Black/White Differences in Hypertension Severity? 858
Effects of Dehydroepiandrosterone Sulfate on Cellular Calcium Responsiveness and Vascular Contractility, 1065
Endothelial Stimulation of Sodium Pump in Cultured Vascular Smooth Muscle, 177
Endothelin Subtype B Receptor–Mediated Calcium and Contractile Responses in Small Arteries of Hypertensive Rats, 1041
Intracellular Ca^{2+} Release in Flow-Induced Contraction of Venous Smooth Muscle, 1051
Structural and Functional Properties of Isolated, Pressurized, Mesenteric Resistance Arteries From a Vasopressin-Deficient Rat Model of Genetic Hypertension, 390
Thromboxane A_2 and Vascular Smooth Muscle Cell Proliferation, 771
Myocardial infarction
Isolated Diastolic Hypertension: A Favorable Finding Among Young and Middle-aged Hypertensive Subjects, 377
Myocardium
Basal and Angiotensin II–Induced Cytosolic Free Calcium in Adult Rat Cardiomyocytes and Fibroblasts After Volume Overload, 1149
Myography
Structural and Functional Properties of Isolated, Pressurized, Mesenteric Resistance Arteries From a Vasopressin-Deficient Rat Model of Genetic Hypertension, 390

N

Na^+,K^+-exchanging ATPase
Biological Determinants of Aldosterone-Induced Cardiac Fibrosis in Rats, 971
Effect of Hypothalamic-Hypophysary Inhibitory Factor on Mesangial Cell Activation, 905
Endogenous Marinobufagenin-like Immunoreactive Factor and Na^+,K^+ ATPase Inhibition During Voluntary Hypoventilation, 781
Endothelial Stimulation of Sodium Pump in Cultured Vascular Smooth Muscle, 177
Na^+,K^+-transporting ATPase (see Na^+,K^+-exchanging ATPase)
Natriuresis
Effect of Captopril and Angiotensin II Receptor Blockade on Pressure Natriuresis in Transgenic TGR(mRen-2)27 Rats, 471
Natriuretic peptides
Acute Effects of Physiological Increments of Brain Natriuretic Peptide in Humans, 628
Comparison of Candoxatril and Atrial Natriuretic Factor in Healthy Men: Effects on Hemodynamics, Sympathetic Activity, Heart Rate Variability, and Endothelin, 1160
Endopeptidase Inhibition in Angiotensin-Induced Hypertension: Effect of SCH 39370 in Sheep, 89
Inhibition by Cardiac Natriuretic Peptides of Rat Vascular Endothelial Cell Migration, 401
Nephritis, interstitial
Nifedipine Prevents Renal Injury in Rats With Chronic Nitric Oxide Inhibition, 150
Nephrosclerosis
Nitric Oxide Synthase Inhibition in Spontaneously Hypertensive Rats: Systemic, Renal, and Glomerular Hemodynamics, 249
Transforming Growth Factor-β1 Expression and Phenotypic Modulation in the Kidney of Hypertensive Rats, 199
Nervous system
Comparison of Candoxatril and Atrial Natriuretic Factor in Healthy Men: Effects on Hemodynamics, Sympathetic Activity, Heart Rate Variability, and Endothelin, 1160
Neuropeptide Y
Enhanced Vascular Neuropeptide Y–Immunoreactive Innervation in Two Hypertensive Rat Strains, 758
Neuropeptide Y Prevents Agonist-Stimulated Increases in Contractility, 480
Neuropeptides
Cardiovascular Effects of a Specific Nonpeptide Antagonist of Substance P (NK-1) Receptor in DOCA-Salt Hypertension, 1186
NHANES
Trends in the Prevalence, Awareness, Treatment, and Control of Hypertension in the Adult US Population: Data From the Health Examination Surveys, 1960 to 1991, 60

Nifedipine
Contribution of Atrial Reservoir Function to Ventricular Filling in Hypertensive Patients: Effects of Nifedipine Administration, 815

Nitric oxide
Chronic Inhibition of Nitric Oxide Synthesis Causes Coronary Microvascular Remodeling in Rats, 957
Chronic Nitric Oxide Synthase Inhibition and Carotid Artery Distensibility in Renal Hypertensive Rats, 332
Effects of Long-term Nitric Oxide Synthesis Inhibition on Plasma Volume Expansion and Fetal Growth in the Pregnant Rat, 1019
Endothelial AT_1–Mediated Release of Nitric Oxide Decreases Angiotensin II Contractions in Rat Carotid Artery, 752
Gene Expression of Brain Nitric Oxide Synthase and Soluble Guanylyl Cyclase in Hypothalamus and Medulla of Two-Kidney, One Clip Hypertensive Rats, 171
Nifedipine Prevents Renal Injury in Rats With Chronic Nitric Oxide Inhibition, 150
Nitric Oxide and Prostaglandins in the Prolonged Effects of Losartan and Ramipril in Hypertension, 236
Nitric Oxide Synthase Inhibition in Spontaneously Hypertensive Rats: Systemic, Renal, and Glomerular Hemodynamics, 249
Nitric Oxide Synthase Isoform Activities in Kidney of Dahl Salt-Sensitive Rats, 1030
Oleic Acid Inhibits Endothelial Nitric Oxide Synthase by a Protein Kinase C–Independent Mechanism, 764
Plasma From Women With Preeclampsia Increases Endothelial Cell Nitric Oxide Production, 244
Pressor and Reflex Sensitivity Is Altered in Spontaneously Hypertensive Rats Treated With Angiotensin-(1-7), 1138
Relationship of Arachidonic Acid Release to Porcine Coronary Artery Relaxation, 684
Renal Vasodilation With L-Arginine: Effects of Dietary Salt, 256
Role of Basal and Stimulated Release of Nitric Oxide in the Regulation of Radial Artery Caliber in Humans, 327
Role of Nitric Oxide in Modulating the Vasoconstrictor Actions of Angiotensin II in Preglomerular and Postglomerular Vessels in Dogs, 1024
Role of Superoxide in the Depressed Nitric Oxide Production by the Endothelium of Genetically Hypertensive Rats, 854
Stimulation of Endogenous Nitric Oxide Pathway by L-Arginine Reduces Declamp Mortality and Attenuates Hypertension Associated With Aortic Cross-Clamp–Induced Hindlimb Ischemia in Rats, 406
Sympathetically Mediated Hypertension Caused by Chronic Inhibition of Nitric Oxide, 691

Nitrites
Coronary Kinin Generation Mediates Nitric Oxide Release After Angiotensin Receptor Stimulation, 164

Nitro compounds
Chronic Nitric Oxide Synthase Inhibition and Carotid Artery Distensibility in Renal Hypertensive Rats, 332
Stimulation of Endogenous Nitric Oxide Pathway by L-Arginine Reduces Declamp Mortality and Attenuates Hypertension Associated With Aortic Cross-Clamp–Induced Hindlimb Ischemia in Rats, 406

Nitroglycerin
Underestimation of Vasodilator Effects of Nitroglycerin by Upper Limb Blood Pressure, 520

Nitroprusside
Chronic Infusion of Angiotensin II Resets Baroreflex Control of Heart Rate by an Arterial Pressure–Independent Mechanism, 420
Regulation of Vascular Smooth Muscle Soluble Guanylate Cyclase Activity, mRNA, and Protein Levels by cAMP-Elevating Agents, 696
Vasodilator Response of Mesenteric Arterioles to Histamine in Spontaneously Hypertensive Rats, 397

Norepinephrine
β-Adrenergic, Angiotensin II, and Bradykinin Receptors Enhance Neurotransmission in Human Kidney, 445
Cyclosporine Impairs Vasodilation Without Increased Sympathetic Activity in Humans, 705
Influence of Androgen on Tyrosine Hydroxylase mRNA in Adrenal Medulla of Spontaneously Hypertensive Rats, 208
Insulin Modulation of Vascular Reactivity Is Already Impaired in Prehypertensive Spontaneously Hypertensive Rats, 290
Nitric Oxide Synthase Isoform Activities in Kidney of Dahl Salt-Sensitive Rats, 1030
Pressor Effects of Portal Venous Oleate Infusion: A Proposed Mechanism for Obesity Hypertension, 193
Suppressing Sympathetic Activation in Congestive Heart Failure: A New Therapeutic Strategy, 719

O

Obesity
Combined Renal Effects of Overweight and Hypertension, 610
Glucose Metabolism in Abdominally Obese Hypertensive and Normotensive Subjects, 186
Hemodynamic Alterations in Hypertensive Obese Rabbits, 465
Pressor Effects of Portal Venous Oleate Infusion: A Proposed Mechanism for Obesity Hypertension, 193
Radial Artery Compliance in Young, Obese, Normotensive Subjects, 984
Weight Threshold and Blood Pressure in a Lean Black Population, 616

Oligonucleotides, antisense
Transient Decrease in High Blood Pressure by In Vivo Transfer of Antisense Oligodeoxynucleotides Against Rat Angiotensinogen, 131

Organ culture
Heterogeneity of Adenovirus-Mediated Gene Transfer in Cultured Thoracic Aorta and Renal Artery of Rats, 1046

Ouabain
Endothelial Stimulation of Sodium Pump in Cultured Vascular Smooth Muscle, 177

P

Parainfluenza virus type 1
Transient Decrease in High Blood Pressure by In Vivo Transfer of Antisense Oligodeoxynucleotides Against Rat Angiotensinogen, 131

Patch-clamp techniques
Augmented Calcium Currents in Mesenteric Artery Branches of the Spontaneously Hypertensive Rat, 1060

Periaqueductal gray
Role of Periaqueductal Gray Matter in Hypertension in Spontaneously Hypertensive Rats, 1125

Pertussis toxins
Thromboxane A_2 and Vascular Smooth Muscle Cell Proliferation, 771

Phenethanolamine *N*-methyltransferase
Investigation of the Phenylethanolamine *N*-Methyltransferase Gene as a Candidate Gene for Hypertension, 595

Phenotype
Transforming Growth Factor-β1 Expression and Phenotypic Modulation in the Kidney of Hypertensive Rats, 199

Phenylephrine
Chronic Infusion of Angiotensin II Resets Baroreflex Control of Heart Rate by an Arterial Pressure–Independent Mechanism, 420
Neuropeptide Y Prevents Agonist-Stimulated Increases in Contractility, 480

Phorbols
Regulation and Differential Expression of Neutral Endopeptidase 24.11 in Human Endothelial Cells, 230

Phospholipases
Relationship of Arachidonic Acid Release to Porcine Coronary Artery Relaxation, 684

Phosphorylation
Sodium-Proton Exchange and Primary Hypertension: An Update, 649

Plasminogen activator inhibitor 1
Enhanced Levels of Tissue-Type Plasminogen Activator in Borderline Hypertension, 796

Platelet activation (see Blood platelets)
Platelet aggregation (see Blood platelets)
Platelet factor 4 (see Blood platelets)
Plethysmography
In Vivo Characterization of Muscarinic Receptor Subtypes That Mediate Vasodilatation in Patients With Essential Hypertension, 70
Polymerase chain reaction
Adenosine A_1 Receptor mRNA in Microdissected Rat Nephron Segments, 1181
Gene Expression of Brain Nitric Oxide Synthase and Soluble Guanylyl Cyclase in Hypothalamus and Medulla of Two-Kidney, One Clip Hypertensive Rats, 171
Left Ventricular Fibrosis in Renovascular Hypertensive Rats: Effect of Losartan and Spironolactone, 101
Renin mRNA, Quantified by Polymerase Chain Reaction, in Renal Hypertensive Rat Tissues, 656
Polymorphism (genetics)
Influence of Angiotensin II Type 1 Receptor Polymorphism on Aortic Stiffness in Never-Treated Hypertensive Patients, 44
Population
Genetic and Environmental Factors in the Function and Structure of the Arterial Wall, 34
Portal vein
Pressor Effects of Portal Venous Oleate Infusion: A Proposed Mechanism for Obesity Hypertension, 193
Potassium
Combinations of Potassium, Calcium, and Magnesium Supplements in Hypertension, 950
Intracellular Ca^{2+} Release in Flow-Induced Contraction of Venous Smooth Muscle, 1051
Prasterone
Effects of Dehydroepiandrosterone Sulfate on Cellular Calcium Responsiveness and Vascular Contractility, 1065
Preeclampsia
Plasma From Women With Preeclampsia Increases Endothelial Cell Nitric Oxide Production, 244
Pregnancy
Effects of Long-term Nitric Oxide Synthesis Inhibition on Plasma Volume Expansion and Fetal Growth in the Pregnant Rat, 1019
Plasma From Women With Preeclampsia Increases Endothelial Cell Nitric Oxide Production, 244
Preoptic area
Thyrotropin-Releasing Hormone Hyperactivity in the Preoptic Area of Spontaneously Hypertensive Rats, 1105
Pressoreceptors
Differential Modulation of Baroreceptor Sensitivity by Long-term Antihypertensive Treatment, 425
Sympathetic Modulation of Radial Artery Compliance in Congestive Heart Failure, 348
Prevalence
Hypertension Prevalence, Awareness, Treatment, and Control in Egypt: Results From the Egyptian National Hypertension Project (NHP), 886
The Egyptian National Hypertension Project (NHP): Design and Rationale, 880
Trends in the Prevalence, Awareness, Treatment, and Control of Hypertension in the Adult US Population: Data From the Health Examination Surveys, 1960 to 1991, 60
Prokallikrein
Expression of Rat Kallikrein and Epithelial Polarity in Transfected Madin-Darby Canine Kidney Cells, 891
Prostaglandins
Angiotensin-(1-7) Potentiates the Hypotensive Effect of Bradykinin in Conscious Rats, 1154
Nitric Oxide and Prostaglandins in the Prolonged Effects of Losartan and Ramipril in Hypertension, 236
Pressor and Reflex Sensitivity Is Altered in Spontaneously Hypertensive Rats Treated With Angiotensin-(1-7), 1138
Prostacyclin Synthesis Elicited by Endothelin-1 in Rat Aorta Is Mediated by an ET_A Receptor via Influx of Calcium and Is Independent of Protein Kinase C, 1035
Renal Circulation and Blockade of the Renin-Angiotensin System: Is Angiotensin-Converting Enzyme Inhibition the Last Word? 602
Protein kinases
Regulation and Differential Expression of Neutral Endopeptidase 24.11 in Human Endothelial Cells, 230
Prothyroliberin
Thyrotropin-Releasing Hormone Hyperactivity in the Preoptic Area of Spontaneously Hypertensive Rats, 1105
Pseudohypertension
Isolated Elevation of Diastolic Blood Pressure: Real or Artifactual? 383
Pulse
Assessment of Arterial Distensibility by Automatic Pulse Wave Velocity Measurement: Validation and Clinical Application Studies, 485
Effect of Regional and Systemic Changes in Vasomotor Tone on Finger Pressure Amplification, 315
Pulse Pressure and Resistance Artery Structure in the Elderly, 301
Punctures
Nitric Oxide Synthase Inhibition in Spontaneously Hypertensive Rats: Systemic, Renal, and Glomerular Hemodynamics, 249
Purinergic receptors (see Receptors, purinergic)

R

Rabbits
Chronic Infusion of Angiotensin II Resets Baroreflex Control of Heart Rate by an Arterial Pressure–Independent Mechanism, 420
Effects of Furosemide and Verapamil on the NaCl Dependency of Macula Densa–Mediated Renin Secretion, 137
Hemodynamic Alterations in Hypertensive Obese Rabbits, 465
Radial artery
Flow-Diameter Phase Shift: A Potential Indicator of Conduit Artery Function, 20
Postischemic Blood Flow Response in Hypercholesterolemic Patients, 497
Radial Artery Compliance in Young, Obese, Normotensive Subjects, 984
Sympathetic Modulation of Radial Artery Compliance in Congestive Heart Failure, 348
Radial directions
Mechanical Factors Associated With the Development of Intimal and Medial Thickening in Vein Grafts Subjected to Arterial Pressure: A Model of Arteries Exposed to Hypertension, 38
Ramipril
Inhibition of Atrial Natriuretic Peptide Excretory Action by Bradykinin, 1167
Rats
Biaxial Mechanical Properties of Carotid Arteries From Normotensive and Hypertensive Rats, 15
Chronic Angiotensin-Converting Enzyme Inhibition and Endothelial Function of Rat Aorta, 738
Cloning, Characterization, and Genetic Mapping of the Rat Type 2 Angiotensin II Receptor Gene, 998
Effects of an Endothelin Receptor Antagonist in Rats With Cyclosporine-Induced Hypertension, 932
Inhibition by Cardiac Natriuretic Peptides of Rat Vascular Endothelial Cell Migration, 401
Pressor Effects of Portal Venous Oleate Infusion: A Proposed Mechanism for Obesity Hypertension, 193
Role of the Rostral Ventrolateral Medulla in Maintenance of Blood Pressure in Rats With Goldblatt Hypertension, 1117
Sympathetically Mediated Hypertension Caused by Chronic Inhibition of Nitric Oxide, 691
Rats, inbred SHR
Aortic Wall Properties in Normotensive and Hypertensive Rats of Various Ages In Vivo, 363
Augmented Calcium Currents in Mesenteric Artery Branches of the Spontaneously Hypertensive Rat, 1060
Differential Modulation of Baroreceptor Sensitivity by Long-term Antihypertensive Treatment, 425

Effects of Low and High Doses of Fosinopril on the Structure and Function of Resistance Arteries, 118
Endothelin Subtype B Receptor–Mediated Calcium and Contractile Responses in Small Arteries of Hypertensive Rats, 1041
Enhanced Vascular Neuropeptide Y–Immunoreactive Innervation in Two Hypertensive Rat Strains, 758
Human Atrial Natriuretic Peptide Gene Delivery Reduces Blood Pressure in Hypertensive Rats, 847
Influence of Androgen on Tyrosine Hydroxylase mRNA in Adrenal Medulla of Spontaneously Hypertensive Rats, 208
Low-Intensity Exercise Training Attenuates Cardiac β-Adrenergic Tone During Exercise in Spontaneously Hypertensive Rats, 1129
Nitric Oxide Synthase Inhibition in Spontaneously Hypertensive Rats: Systemic, Renal, and Glomerular Hemodynamics, 249
Role of Periaqueductal Gray Matter in Hypertension in Spontaneously Hypertensive Rats, 1125
Role of Superoxide in the Depressed Nitric Oxide Production by the Endothelium of Genetically Hypertensive Rats, 854
Thyrotropin-Releasing Hormone Hyperactivity in the Preoptic Area of Spontaneously Hypertensive Rats, 1105
Transient Decrease in High Blood Pressure by In Vivo Transfer of Antisense Oligodeoxynucleotides Against Rat Angiotensinogen, 131

Rats, inbred strains
Blood Pressure in Genetically Hypertensive Rats: Influence of the Y Chromosome, 452
Enhanced Vascular Neuropeptide Y–Immunoreactive Innervation in Two Hypertensive Rat Strains, 758
Investigation of the Phenylethanolamine *N*-Methyltransferase Gene as a Candidate Gene for Hypertension, 595
Nitric Oxide Synthase Isoform Activities in Kidney of Dahl Salt-Sensitive Rats, 1030

Rats, inbred WKY
Aortic Wall Properties in Normotensive and Hypertensive Rats of Various Ages In Vivo, 363
Enhanced Vascular Neuropeptide Y–Immunoreactive Innervation in Two Hypertensive Rat Strains, 758

Rats, transgenic
Effect of Captopril and Angiotensin II Receptor Blockade on Pressure Natriuresis in Transgenic TGR(mRen-2)27 Rats, 471
Effects of Human Renin in the Vasculature of Rats Transgenic for Human Angiotensinogen, 272

Receptors, adrenergic
Modulation of Left and Right Ventricular β-Adrenergic Receptors From Spontaneously Hypertensive Rats With Left Ventricular Hypertrophy and Failure, 78
Neuropeptide Y Prevents Agonist-Stimulated Increases in Contractility, 480
Short- and Long-term Effects of Antihypertensive Drugs on Arterial Reflections, Compliance, and Impedance, 524

Receptors, adrenergic, alpha (see Receptors, adrenergic)

Receptors, adrenergic, beta (see Receptors, adrenergic)
β-Adrenergic, Angiotensin II, and Bradykinin Receptors Enhance Neurotransmission in Human Kidney, 445

Receptors, angiotensin
Cloning, Characterization, and Genetic Mapping of the Rat Type 2 Angiotensin II Receptor Gene, 998
Coronary Kinin Generation Mediates Nitric Oxide Release After Angiotensin Receptor Stimulation, 164
Distinct Mechanisms of Upregulation of Type 1A Angiotensin II Receptor Gene Expression in Kidney and Adrenal Gland, 1134
Effect of Captopril and Angiotensin II Receptor Blockade on Pressure Natriuresis in Transgenic TGR(mRen-2)27 Rats, 471
Effects of Losartan on a Background of Hydrochlorothiazide in Patients With Hypertension, 112
Effects of Losartan on Blood Pressure, Metabolic Alterations, and Vascular Reactivity in the Fructose-Induced Hypertensive Rat, 1074
Gene Expression of Angiotensin II Receptor in Blood Cells of Cushing's Syndrome, 1003
Heterogeneity in Vascular Smooth Muscle Responsiveness to Angiotensin II: Role of Endothelin, 83
Influence of Angiotensin II Type 1 Receptor Polymorphism on Aortic Stiffness in Never-Treated Hypertensive Patients, 44
Nitric Oxide and Prostaglandins in the Prolonged Effects of Losartan and Ramipril in Hypertension, 236
Regional Hemodynamic Effects of the AT_1 Receptor Antagonist CV-11974 in Conscious Renal Hypertensive Rats, 989
Renin and Angiotensin II Receptor Gene Expression in Kidneys of Renal Hypertensive Rats, 733

Receptors, endothelin
Effects of an Endothelin Receptor Antagonist in Rats With Cyclosporine-Induced Hypertension, 932
Prostacyclin Synthesis Elicited by Endothelin-1 in Rat Aorta Is Mediated by an ET_A Receptor via Influx of Calcium and Is Independent of Protein Kinase C, 1035

Receptors, muscarinic
In Vivo Characterization of Muscarinic Receptor Subtypes That Mediate Vasodilatation in Patients With Essential Hypertension, 70

Receptors, purinergic
Adenosine A_1 Receptor mRNA in Microdissected Rat Nephron Segments, 1181

Receptors, serotonin
5-Hydroxytryptamine$_{2B}$ Receptor Mediates Contraction in the Mesenteric Artery of Mineralocorticoid Hypertensive Rats, 1056

Receptors, vasopressin
Attenuation of Genetic Hypertension After Short-term Vasopressin V1A Receptor Antagonism, 828
Glucocorticoids Regulate V_{1a} Vasopressin Receptor Expression by Increasing mRNA Stability in Vascular Smooth Muscle Cells, 665

Recombinant proteins
Expression of Rat Kallikrein and Epithelial Polarity in Transfected Madin-Darby Canine Kidney Cells, 891

Relaxation
A Randomized Controlled Trial of Stress Reduction for Hypertension in Older African Americans, 820
Contribution of Atrial Reservoir Function to Ventricular Filling in Hypertensive Patients: Effects of Nifedipine Administration, 815

Remodeling
Aortic Wall Properties in Normotensive and Hypertensive Rats of Various Ages In Vivo, 363
Sick Vessel Syndrome: Recovery of Atherosclerotic and Hypertensive Vessels, 509

Renal artery
Heterogeneity of Adenovirus-Mediated Gene Transfer in Cultured Thoracic Aorta and Renal Artery of Rats, 1046

Renal circulation
Combined Renal Effects of Overweight and Hypertension, 610
Contrasting Effect of Antihypertensive Treatment on the Renal Response to L-Arginine, 937
Regional Hemodynamic and Endocrine Effects of Aldosterone and Cortisol in Conscious Sheep: Comparison With the Effects of Corticotropin, 294

Renal micropuncture (see Punctures)

Renal tubule
Adenosine A_1 Receptor mRNA in Microdissected Rat Nephron Segments, 1181

Renin
Amylin Stimulates Plasma Renin Concentration in Humans, 460
Effects of Human Renin in the Vasculature of Rats Transgenic for Human Angiotensinogen, 272
Effects of Long-term Nitric Oxide Synthesis Inhibition on Plasma Volume Expansion and Fetal Growth in the Pregnant Rat, 1019
Effects of SC-56525, a Potent, Orally Active Renin Inhibitor, in Salt-Depleted and Renal Hypertensive Dogs, 95
Renal Circulation and Blockade of the Renin-Angiotensin System: Is Angiotensin-Converting Enzyme Inhibition the Last Word? 602
Renin and Angiotensin II Receptor Gene Expression in Kidneys of Renal Hypertensive Rats, 733
Renin mRNA, Quantified by Polymerase Chain Reaction, in Renal Hypertensive Rat Tissues, 656

Renin-angiotensin system
Acute Effects of Physiological Increments of Brain Natriuretic Peptide in Humans, 628
Altered Angiotensinogen Amino Acid Sequence and Plasma Angiotensin II Levels in Genetically Hypertensive Rats: A Study on Cause and Effect, 279
Angiotensin-(1-7) Potentiates the Hypotensive Effect of Bradykinin in Conscious Rats, 1154
Effects of Human Renin in the Vasculature of Rats Transgenic for Human Angiotensinogen, 272
Effects of SC-56525, a Potent, Orally Active Renin Inhibitor, in Salt-Depleted and Renal Hypertensive Dogs, 95
Endopeptidase Inhibition in Angiotensin-Induced Hypertension: Effect of SCH 39370 in Sheep, 89
Influence of Angiotensin II Type 1 Receptor Polymorphism on Aortic Stiffness in Never-Treated Hypertensive Patients, 44
Renal Artery Stenosis Rapidly Enhances Atrial Natriuretic Peptide Gene Expression, 1011
Renovascular hypertension (see Hypertension, renovascular)
Resistance, vascular (see Vascular resistance)
Respiratory function
Cardiovascular and Respiratory Effects of Endothelin in the Ventrolateral Medulla of the Normotensive Rat, 263
Reverse transcription (see Transcription, genetic)
Risk factors
Isolated Diastolic Hypertension: A Favorable Finding Among Young and Middle-aged Hypertensive Subjects, 377
Suboptimal Outcome of Management of Metabolic Cardiovascular Risk Factors in Hispanic Patients With Essential Hypertension, 1079
RNA
Gene Expression of Angiotensin II Receptor in Blood Cells of Cushing's Syndrome, 1003
Glucocorticoids Regulate V_{1a} Vasopressin Receptor Expression by Increasing mRNA Stability in Vascular Smooth Muscle Cells, 665
Influence of Androgen on Tyrosine Hydroxylase mRNA in Adrenal Medulla of Spontaneously Hypertensive Rats, 208
Regulation of Neuronal Calcitonin Gene–Related Peptide Expression: Role of Increased Blood Pressure, 1177
Renin and Angiotensin II Receptor Gene Expression in Kidneys of Renal Hypertensive Rats, 733
Renin mRNA, Quantified by Polymerase Chain Reaction, in Renal Hypertensive Rat Tissues, 656
Thromboxane A_2 and Vascular Smooth Muscle Cell Proliferation, 771
RNA, messenger (see RNA)

S

Saralasin
Coronary Kinin Generation Mediates Nitric Oxide Release After Angiotensin Receptor Stimulation, 164
Serotonin
5-Hydroxytryptamine$_{2B}$ Receptor Mediates Contraction in the Mesenteric Artery of Mineralocorticoid Hypertensive Rats, 1056
Sex
Gender and Dietary NaCl in Spontaneously Hypertensive and Wistar-Kyoto Rats, 285
Gender Differences in Left Ventricular Growth, 979
Influence of Sex on Arterial Hemodynamics and Blood Pressure: Role of Body Height, 514
Relationship Between Systemic Hemodynamics and Ambulatory Blood Pressure Level Are Sex Dependent, 1195
Shear stress (see Stress, mechanical)
Sheep
Regional Hemodynamic and Endocrine Effects of Aldosterone and Cortisol in Conscious Sheep: Comparison With the Effects of Corticotropin, 294
SHR (see Rats, inbred SHR)
Signal transduction
Endothelin Subtype B Receptor–Mediated Calcium and Contractile Responses in Small Arteries of Hypertensive Rats, 1041
Enhanced Immunoglobulin Formation of Immortalized B Cells From Hypertensive Patients, 432
Signaling, intracellular (see Signal transduction)
Sodium
Acute Effects of Physiological Increments of Brain Natriuretic Peptide in Humans, 628
Atrial Natriuretic Peptide in Chronically Hypertensive Dogs, 634
Calcium Supplementation Attenuates an Enhanced Platelet Function in Salt-Loaded Mildly Hypertensive Patients, 156
Distinct Mechanisms of Upregulation of Type 1A Angiotensin II Receptor Gene Expression in Kidney and Adrenal Gland, 1134
Gender and Dietary NaCl in Spontaneously Hypertensive and Wistar-Kyoto Rats, 285
Insulin Effect on Renal Sodium Reabsorption in Adolescent Offspring of Essential Hypertensive Parents, 1089
Nitric Oxide Synthase Isoform Activities in Kidney of Dahl Salt-Sensitive Rats, 1030
Sodium-hydrogen antiporter
Enhanced Immunoglobulin Formation of Immortalized B Cells From Hypertensive Patients, 432
Sodium nitroprusside (see Nitroprusside)
Sodium, dietary
Effects of SC-56525, a Potent, Orally Active Renin Inhibitor, in Salt-Depleted and Renal Hypertensive Dogs, 95
Genetic and Environmental Factors in the Function and Structure of the Arterial Wall, 34
Renal Vasodilation With L-Arginine: Effects of Dietary Salt, 256
Somatic gene therapy (see Gene therapy)
Splanchnic circulation
Regional Hemodynamic and Endocrine Effects of Aldosterone and Cortisol in Conscious Sheep: Comparison With the Effects of Corticotropin, 294
Streptozocin
Autonomic Dysfunction in Short-term Experimental Diabetes, 1100
Stress
Stress-Induced Elevation of Ouabainlike Compound in Rat Plasma and Adrenal, 1173
Stress, mechanical
Mechanical Factors Associated With the Development of Intimal and Medial Thickening in Vein Grafts Subjected to Arterial Pressure: A Model of Arteries Exposed to Hypertension, 38
Substance P
Cardiovascular Effects of a Specific Nonpeptide Antagonist of Substance P (NK-1) Receptor in DOCA-Salt Hypertension, 1186
Superoxides
Role of Superoxide in the Depressed Nitric Oxide Production by the Endothelium of Genetically Hypertensive Rats, 854
Sympathectomy
Sympathetically Mediated Hypertension Caused by Chronic Inhibition of Nitric Oxide, 691
Sympathetic nerve activity (see Sympathetic nervous system)
Sympathetic nervous system
Aortic Distensibility and Structural Changes in Sinoaortic-Denervated Rats, 337
Autonomic Dysfunction in Short-term Experimental Diabetes, 1100
Changes of Renal Sympathetic Activity in Acute and Chronic Conscious Sinoaortic Denervated Rats, 1111
Chronic Infusion of Angiotensin II Resets Baroreflex Control of Heart Rate by an Arterial Pressure–Independent Mechanism, 420
Cyclosporine Impairs Vasodilation Without Increased Sympathetic Activity in Humans, 705
Divergent Effects of Dihydropyridine and Phenylalkylamine Calcium Channel Antagonist Classes on Autonomic Function in Human Hypertension, 143
Structural Versus Functional Modulation of the Arterial Baroreflex, 341
Sympathetic Modulation of Radial Artery Compliance in Congestive Heart Failure, 348

Sympathetically Mediated Hypertension Caused by Chronic Inhibition of Nitric Oxide, 691

T

Tachykinins
Cardiovascular Effects of a Specific Nonpeptide Antagonist of Substance P (NK-1) Receptor in DOCA-Salt Hypertension, 1186

Telemetry
Blood Pressure in Genetically Hypertensive Rats: Influence of the Y Chromosome, 452
Gender and Dietary NaCl in Spontaneously Hypertensive and Wistar-Kyoto Rats, 285

Thrombin
Regulation and Differential Expression of Neutral Endopeptidase 24.11 in Human Endothelial Cells, 230

β-Thromboglobulin
Calcium Supplementation Attenuates an Enhanced Platelet Function in Salt-Loaded Mildly Hypertensive Patients, 156

Thromboxane A_2
Thromboxane A_2 and Vascular Smooth Muscle Cell Proliferation, 771

Tonometry
Effects of Hypertension on Viscoelasticity of Carotid and Femoral Arteries in Humans, 48

Transcription genetic
Adenosine A_1 Receptor mRNA in Microdissected Rat Nephron Segments, 1181

Transforming growth factor-β
Transforming Growth Factor-β1 Expression and Phenotypic Modulation in the Kidney of Hypertensive Rats, 199

Twins
Heritability of Conventional and Ambulatory Blood Pressures: A Study in Twins, 919

Tyrosine 3-monooxygenase
Influence of Androgen on Tyrosine Hydroxylase mRNA in Adrenal Medulla of Spontaneously Hypertensive Rats, 208

U

Ultrasonography
Chronic Nitric Oxide Synthase Inhibition and Carotid Artery Distensibility in Renal Hypertensive Rats, 332
Effects of Hypertension on Viscoelasticity of Carotid and Femoral Arteries in Humans, 48
Flow-Diameter Phase Shift: A Potential Indicator of Conduit Artery Function, 20
Noninvasive Determination of Shear-Rate Distribution Across the Arterial Lumen, 26
Prevalence and Determinants of Cardiac and Vascular Hypertrophy in Hypertension, 369

Uremia
Contribution of Systemic Blood Pressure to Myocardial Remodeling in Uremic Rats, 321

V

Valsalva's maneuver
Physiological Influences on Continuous Finger and Simultaneous Intra-arterial Blood Pressure, 307

Vascular endothelium (see Endothelium)

Vascular hypertrophy (see Hypertrophy)

Vascular remodeling (see Remodeling)

Vascular resistance
Comparison of Candoxatril and Atrial Natriuretic Factor in Healthy Men: Effects on Hemodynamics, Sympathetic Activity, Heart Rate Variability, and Endothelin, 1160
Effects of Low and High Doses of Fosinopril on the Structure and Function of Resistance Arteries, 118
Pulse Pressure and Resistance Artery Structure in the Elderly, 301
Relationship Between Systemic Hemodynamics and Ambulatory Blood Pressure Level Are Sex Dependent, 1195
Renal Vasodilation With L-Arginine: Effects of Dietary Salt, 256

Vascular smooth muscle (see Muscle, smooth, vascular)

Vasoconstriction
5-Hydroxytryptamine$_{2B}$ Receptor Mediates Contraction in the Mesenteric Artery of Mineralocorticoid Hypertensive Rats, 1056
Cyclosporine Impairs Vasodilation Without Increased Sympathetic Activity in Humans, 705
Effect of Regional and Systemic Changes in Vasomotor Tone on Finger Pressure Amplification, 315
Endothelin Subtype B Receptor–Mediated Calcium and Contractile Responses in Small Arteries of Hypertensive Rats, 1041
Heterogeneity in Vascular Smooth Muscle Responsiveness to Angiotensin II: Role of Endothelin, 83
Role of Nitric Oxide in Modulating the Vasoconstrictor Actions of Angiotensin II in Preglomerular and Postglomerular Vessels in Dogs, 1024

Vasodilation
Cyclosporine Impairs Vasodilation Without Increased Sympathetic Activity in Humans, 705
Effect of Regional and Systemic Changes in Vasomotor Tone on Finger Pressure Amplification, 315
Regional Hemodynamic Effects of the AT_1 Receptor Antagonist CV-11974 in Conscious Renal Hypertensive Rats, 989

Vasodilation drugs (see Vasodilator agents)

Vasodilator agents
Noninvasive Pulse Wave Analysis for the Early Detection of Vascular Disease, 503
Short- and Long-term Effects of Antihypertensive Drugs on Arterial Reflections, Compliance, and Impedance, 524
Underestimation of Vasodilator Effects of Nitroglycerin by Upper Limb Blood Pressure, 520

Vasomotor system
Effects of Chronic Estrogen Replacement Therapy on Beat-to-Beat Blood Pressure Dynamics in Healthy Postmenopausal Women, 711

Vasopressins
Attenuation of Genetic Hypertension After Short-term Vasopressin V1A Receptor Antagonism, 828

Ventricular function
Contribution of Atrial Reservoir Function to Ventricular Filling in Hypertensive Patients: Effects of Nifedipine Administration, 815

Ventricular hypertrophy, left (see Hypertrophy)

Verapamil
Divergent Effects of Dihydropyridine and Phenylalkylamine Calcium Channel Antagonist Classes on Autonomic Function in Human Hypertension, 143
L-NAME Hypertension Alters Endothelial and Smooth Muscle Function in Rat Aorta: Prevention by Trandolapril and Verapamil, 744

Viscosity
Effects of Hypertension on Viscoelasticity of Carotid and Femoral Arteries in Humans, 48

WKHA (see Rats, inbred strains)

WKHT (see Rats, inbred strains)

WKY (see Rats, inbred WKY)

Y

Y chromosome
Blood Pressure in Genetically Hypertensive Rats: Influence of the Y Chromosome, 452

Young and middle-aged (see Age factors)
